

## Locator for Salesforce Community Cloud

*Connect end customers with partners that meet their unique requirements.*

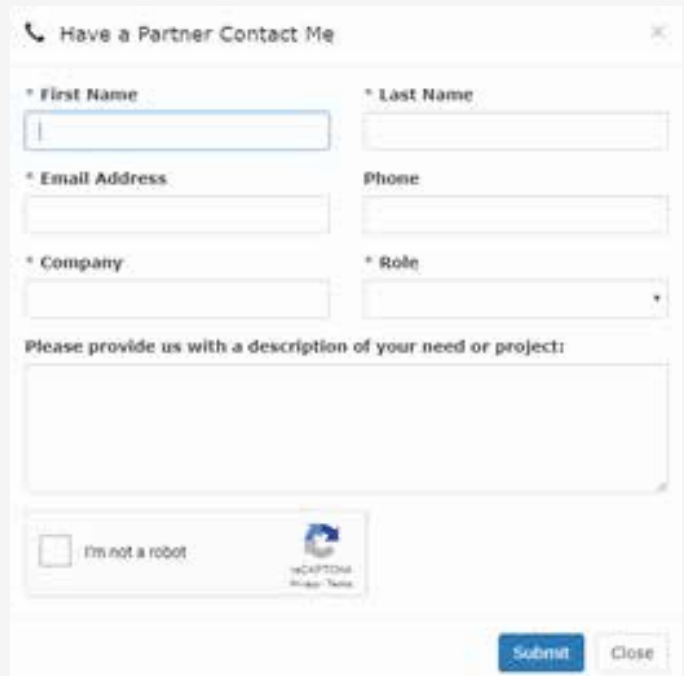

Impartner Locator for Salesforce Community Cloud integrates into the "Find A Partner" section of your corporate website, allowing end users to easily search for partners based on all of the facets tracked in your portal. Search results appear in a list as well as an interactive map.

Branding of the Locator is customized to your company's website brand guidelines and the unique landing pages for each partner also reflect their own brand. Your channel partners can market themselves to prospects through multimedia, video, and downloadable sales collateral.

### key benefits:

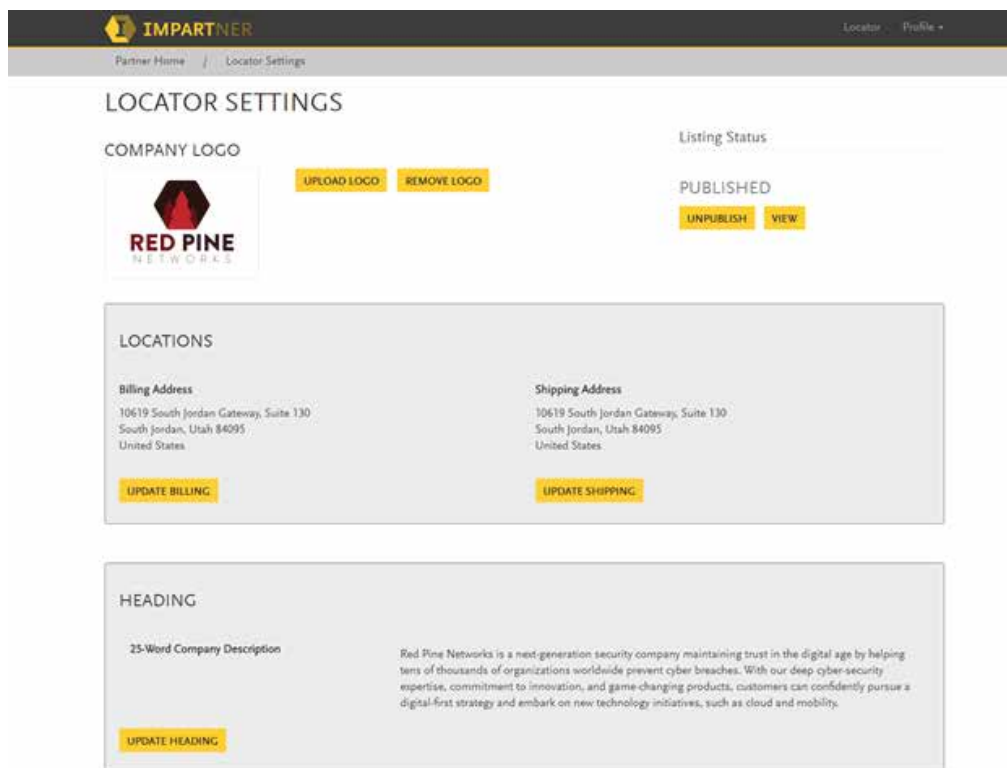

**Partners are in control of their company listing content from within their account profile settings in Communities. No longer is it your burden to keep each partner's listing up-to-date.**

- Manage location, company description, logo that appears in search results.
- Link directly to videos, clients, and more in full company listing details
- Demand generation engine to send leads directly to partners
- Easily configure what listing options partners will have available
- Choose from available style themes or request to match your corporate colors and fonts.

# Features:

- Simple turnkey installation into a Salesforce Community Cloud environment, with complete integration into all facets of your current Partner Program track.
- The ability for partners (once given access by your team), to submit and maintain their own company info that appears on Locator listing.
- Allows end customers to interact with a partner who is in their geographic area, who understands their specific vertical market, who has the requisite certifications, and who can shepherd them through the purchasing process.
- Gives partners unprecedented visibility with end users by making it possible for them to be searched by geographic area, vertical market, certifications, and more.
